

Cooke

Wild - Caught

Argentine Red Shrimp

Pleoticus muelleri

Our Argentine Red Shrimp are wild caught in the cold, clean waters off the coast of Argentina near the Province of Chubut, located in the Southwest Atlantic. The clear and deep waters make this area the most important harvesting grounds for Red Shrimp. The Red Shrimp is quickly processed and frozen at sea on our Factory vessel to preserve maximum freshness and to maintain its unique, premium flavour.

Wild - Caught Argentine Red Shrimp

Pleoticus muelleri

FV DESTINY

- Cooke is launching it's newest shrimp trawler, the FV Destiny - FAS.
- Built by the Astilleros Armon shipyard in Spain, the Destiny is 42.93 meters in total length and 11.10 meters in total width and has a maximum deadweight tonnage of 885
- The Destiny will be one of the newest and most modern fishing vessels in the Argentine shrimp industry, offering the latest processing technology

ARGENTINE RED SHRIMP

- Wild caught off the Southern coast of Argentina in the Southwest Atlantic Ocean
- FAO 41 (catch area)
- On board our vessel the Red Shrimp is frozen at sea into Head on, Shell on (HOSO) or a Head less, Shell on (HLSO) finished product.

FLAVOUR PROFILE

- Vibrant red colour, even when raw
- Delicate in texture
- Slight sweet taste
- Comparable flavour to the Atlantic Lobster
